Selbro, Inc. manufactures a full line of commercial high output walk-behind blowers available with 6, 9, 10 or 13 hp engines. These heavy-duty blowers are manufactured in the United States with heavy-duty materials. The eight blade cast aluminum impellers are aerodynamically designed, dynamically balanced and attached using a quick disconnect taper lock bushing. The blowers also have fully adjustable and reversible handles with anti-vibration grips, full size pneumatic wheels, and hand or foot operated front discharge system. Optional swivel wheel kit also available. All blowers carry a 1-year limited warranty.
