

Poulan Pro PR624ES Two-Stage Snow Thrower

- 24-Inch Width
- 208cc LCT Engine
- Electric Start
- Model 961920037

This 2 stage snow thrower is well-suited for homeowners who live in areas with light to moderate snow accumulation. A 24" open width and 23" intake height make this model great for clearing sidewalks and driveways. Controls on the operator panel move the unit in forward and reverse, as well as rotate the discharge chute's position.

Poulan Pro PR827ES Two-Stage Snow Thrower

- 27-Inch Width
- 205cc Briggs
- Electric Start
- Power Steering
- Headlight
- Model 961920046

This 2 stage snow thrower is well-suited for homeowners who live in areas with moderate to heavy snow accumulation. Headlight, power steering, and large, deep-tread tires allow for increased maneuverability and stability and a 27" open width and 23" intake height make this model great for clearing walks and driveways. Controls on the operator panel move the unit in forward and reverse, as well as rotate the discharge chute's position and pitch.

Poulan Pro PR627ES Two-Stage Snow Thrower

- 27-Inch Width
- 208cc LCT Engine
- Electric Start
- Headlight
- Model 961920038

This 2 stage snow thrower is well-suited for homeowners who live in areas with moderate to heavy snow accumulation. Headlight, large, deep-tread tires allow for increased maneuverability and stability, and a 27" open width and 23" intake height make this model great for clearing sidewalks and driveways. Controls on the operator panel move the unit in forward and reverse, as well as rotate the discharge chute's position.

Poulan Pro PR830ES Two-Stage Snow Thrower

- 30-Inch Width
- 291cc LCT Engine
- Electric Start
- Power Steering
- Headlight
- Model 961940009

This 2-stage snow thrower is well-suited for homeowners who live in areas with moderate to heavy snow accumulation. Power steering and large, deep-tread tires allow for increased maneuverability and stability, and a 30" open width and 23" intake height allow for quick clearance on sidewalks and driveways. Convenient controls on the operator panel move the unit in forward and reverse, as well as rotate the discharge chute's position and pitch.
